

About the Internet & Information Sharing

The internet
is powerful.

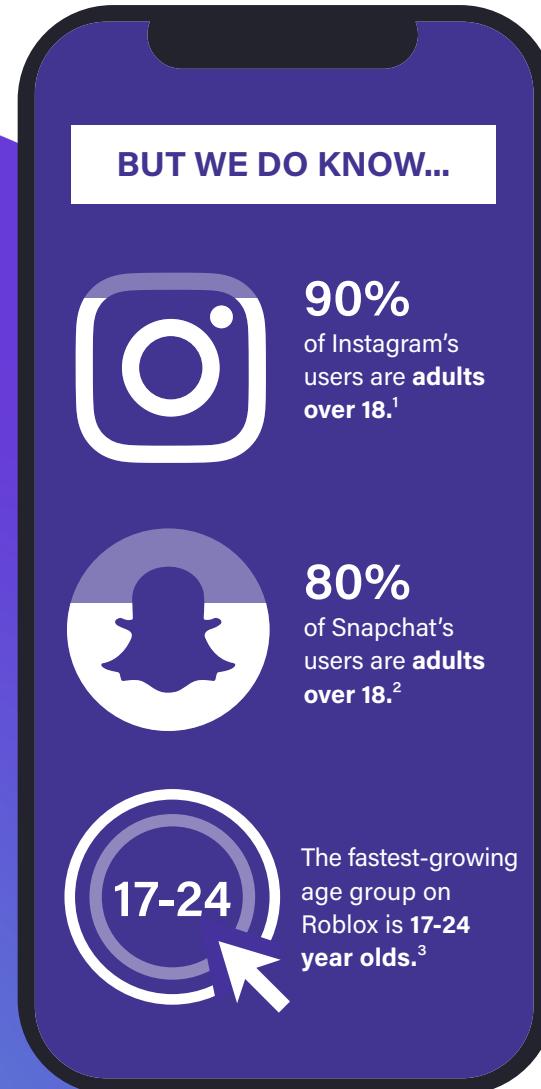

It's our passage to the digital world,
where we have access to the 5 billion
other people that use it from the palm
of our hand.

Who are the 5 billion users?

They consist of:

- ☺ Parents
- ☺ Kids
- ☺ Workers
- ☺ Teachers
- ☺ Criminals
- ☺ Predatory people

! UNLESS YOU KNOW THESE PEOPLE IN PERSON, THERE IS NO WAY TO ACTUALLY KNOW WHO SOMEONE IS.

So think...

Are all your accounts
equally private?

What information are
you sharing online?

**Because staying
safe online
means staying
safe in person.**

Q&A

So what is
safe vs unsafe
information sharing?

You have a bunch of followers on your account. Some of them you know in person and others are people you've met online. Let's brainstorm some things that would be okay and not okay to share:

✓ WHAT'S OKAY	✗ WHAT'S NOT OKAY
<p>Non-Revealing Information:</p> <ul style="list-style-type: none"> ✓ A movie you just watched ✓ A food you like <hr/> <hr/> <hr/> <hr/>	<p>Revealing Information:</p> <ul style="list-style-type: none"> ✗ Names of pets or friends ✗ Your sports team <hr/> <hr/> <hr/> <hr/>
<p>"Safe" Photos:</p> <ul style="list-style-type: none"> ✓ A selfie in a plain background with plain clothing ✓ A picture of a dish you ate <hr/> <hr/> <hr/> <hr/>	<p>Non-Safe Photos:</p> <ul style="list-style-type: none"> ✗ A picture of yourself in front of your school ✗ Pictures of places you hang out <hr/> <hr/> <hr/> <hr/>
